

TABLE 2.  
Bjørnøya

Species	1958 n	1950	1940	1930	1920	1910	Before 1900
<i>Plectrophenax nivalis</i>							
<i>Emberiza citrinella</i>							
<i>Loxia curvirostra</i>							
<i>Carduelis flammea</i>							
<i>Sturnus vulgaris</i>							
<i>Motacilla alba</i>	A a						
<i>Anthus spinoletta</i>							
<i>Oenanthe oenanthe</i>							
<i>Turdus merula</i>							
<i>Turdus iliacus</i>							
<i>Corvus corone cornix</i>							
<i>Corvus corax</i>							
<i>Delichon urbica</i>	A						
<i>Hirundo rustica</i>	a						
<i>Columba palumbus</i>							
<i>Fratercula arctica naumanni</i>							
<i>Fratercula arctica arctica</i>							
<i>Cepphus grylle mandtii</i>							
<i>Uria lomvia</i>							
<i>Uria aalge hyperborea</i>							
<i>Plautus alle</i>							
<i>Alca torda pica</i>							
<i>Sterna paradisaea</i>							
<i>Rissa tridactyla</i>							
<i>Larus canus</i>							
<i>Larus hyperboreus</i>							
<i>Larus argentatus</i>							
<i>Larus fuscus</i>			A				
<i>Larus marinus</i>	n						
<i>Pagophila eburnea</i>							
<i>Catharacta skua</i>	a						
<i>Stercorarius longicaudus</i>							
<i>Stercorarius pomarinus</i>							
<i>Stercorarius parasiticus</i>							
<i>Phalaropus fulicarius</i>	n						
<i>Calidris alpina</i>							
<i>Calidris maritima</i>							
<i>Tringa totanus</i>			a				
<i>Numenius phaeopus</i>	a						
<i>Arenaria interpres</i>							
<i>Pluvialis apricarius altifrons</i>							
<i>Charadrius hiaticula</i>							
<i>Vanellus vanellus</i>							
<i>Haematopus ostralegus</i>	a						
<i>Lagopus mutus hyperboreus</i>							
<i>Cygnus bewickii</i>	A?						
<i>Branta bernicla hrota</i>							
<i>Anser f. brachyrhynchus</i>							
<i>Mergus merganser</i>							
<i>Somateria spectabilis</i>							
<i>Somateria mollissima</i>							
<i>Melanitta nigra</i>							
<i>Clangula hyemalis</i>							
<i>Aythya marila</i>							
<i>Aythya fuligula</i>							
<i>Anas acuta</i>							
<i>Anas penelope</i>							
<i>Anas crecca</i>							
<i>Sula bassana</i>							
<i>Fulmarus glacialis</i>							
<i>Procellaria grisea</i>		A					
<i>Gavia stellata</i>							
<i>Gavia arctica</i>	N						
<i>Gavia immer</i>	n

Breeder, common

Breeder, more or less regularly, small numbers

Visitor, more or less regularly

Nesting, rare

Nesting, tried to or seemed to

Nesting, first record

Visitor, rare

Visitor, first record

In addition to the population of birds which existed on the island before 1920, about 50% more species have either nested or have tried to nest between 1921 and 1959.
